

## Rediscover the pleasure of bathing

We understand you still want to do the things you have always enjoyed and there is nothing like indulging in a warm, soothing bath. With the help of the Mangar Bathing Cushion, you still can.

The Bathing Cushion is an inflatable bath lift that helps you get in and out of your bath. In fact it's the only bath lift that lowers you right to the bottom of the bath which means you can recline and bathe fully immersed in the water just like you normally would.

**Wide stable inflatable seating platform for increased safety and easy transfers**

### Easy to use

The cushion attaches to the bottom of the bath by means of suction cups and is inflated using a compact compressor and simple hand controller. Once the cushion is fully inflated fill the bath to about two thirds full. Sit on the wide, stable seating platform and transfer your legs into the water. At the press of a button deflate the cushion to lower yourself gently into the water. You can completely deflate the cushion and lie back fully immersed in the water to relax away those aches and pains - perfect if you have reasonable upper body

**The back rest supports you in a reclined position of your choice for maximum comfort**

stability. Or leave a little air in the cushion to gently support your back.

### Light and portable

Lightweight and portable, the Bathing Cushion is easy to remove and store when not in use so its ideal where the bathroom is shared or if discretion is important. Because its so compact and light, it easily fits into a travel bag for holidays.

### Who will benefit

Anyone who has difficulty getting into and out of the bath will benefit from using the Bathing Cushion. It is well suited to people who have some upper body stability. However, stability can be improved if necessary by adding a strategically placed grab handle on the wall to assist your balance as the cushion lowers and raises.

### Easy to clean

The Bathing Cushion is manufactured from a hygienic polyurethane coated nylon which does not absorb moisture. It is easy to clean with a normal soap or detergent and then rinsed or with alcohol wipes to kill germs. There is no stitching on the product which further enhances hygiene.

Lowers right to the bottom of the bath to fully immerse you in the water

- Economical – use less water
- Lowers you right to the bottom of the bath so you can lie back and immerse yourself properly
- Lumbar back rest supports you in the reclined position of your choice
- Wide stable seating platform so you can transfer easily
- Lightweight for easy removal and storage
- Easy clean and hygienic
- To ensure safety the Bathing Cushion is air powered with no need for electricity. A rechargeable air flow compressor and waterproof hand control is included

The bathing cushion inflates to provide a hard stable seat to enable safe transfers in and out of the bath
